RE: Video Conferencing in the courtroom

Our local video network capability in the courtroom has been upgraded to allow remote testimony from state agencies outside of Deschutes County. The agency outside of Deschutes County must be connected to the statewide network to be compatible with our system. If the court allows remote testimony from a state agency, staff must know in advance to ensure connections work properly.

If you wish to use the court's video conferencing system for remote testimony, you must:

File a written request with the court 48 hours in advance. Specify the agency name and location; IP address of the agency; and the date/time for the testimony.

Feel free to contact me if you have any questions.
