

Our Services

Our services fall under two main categories:

1. Outpatient Services
(PMT & IHB)
2. Multidimensional Treatment
Foster Care (TFC & EIFC)

Intensive Home-Based Treatment is outpatient services for family with children currently living or soon to be returning to their home. IHB includes intensive wraparound and case management, family services, and may include individual services for the child. Family services include individualized behavior management systems, family therapy, parent training and 24 hour crisis support. IHB services also include consultation with schools and other agencies. Individual services for the child may include individual therapy and skills training. Intensive home-based services are provided through the Connections program.

Multidimensional Treatment Foster Care is foster care for the child with a highly skilled and trained family. MTFC includes intensive case coordination with involved agencies (OYA, DYS, DHS). MTFC also includes services to the biological family or aftercare resource as well as services to the individual child. MTFC is provided through Title XIX, Allies, Monitor & EIFC.

About OCP

OSLC Community Programs is a private nonprofit agency that has provided research-based treatment and prevention services and programs to children, youth, and families since 1983. We

1. Conduct Multidimensional Treatment Foster Care programs
2. Provide Intensive Home-Based services
3. Consult with communities and agencies wishing to implement MTFC

Prior to 1999, OCP was a division of the Oregon Social Learning Center (OSLC), which is a private nonprofit research group supported by federally-funded grants from agencies such as the National Institute of Mental Health, and the National Institute on Drug Abuse.

The mission of OCP is to implement research-based treatment and prevention methods and practices in community settings in order to improve outcomes for children, youth, and families.

The Programs

Connections IHB & MTFC

Connections Multidimensional Treatment Foster Care and Intensive Home-based Programs have served over 600 youth and families since 1992. Participating youth range in age from 3 to 19 years. Specialized Early Intervention Foster Care (EIFC) is tailored for kids 3-5 years old. The program is directed by Kim Bronz Ph.D. and Rena Gold, M.S.W. Connections is primarily funded through the Oregon Health Plan and referrals are made by contacting Rena Gold.

Monitor Program MTFC

Established in 1983, the Monitor program has provided MTFC to over 300 youth who were referred due to chronic and severe problems with delinquency. Participating youth range in age from 12 to 18 years. The lead program supervisor for Monitor is JP Davis. Dana Smith, Ph.D., and Beth Klein, L.C.S.W., also provide program supervision. Monitor serves 20 youth. The Monitor Program is funded by the Oregon Youth Authority. Referrals are made through Parole & Probation officers from across the State of Oregon.

Allies Program MTFC

Established in 1996, Allies MTFC has served over 40 youth between the ages of 4 and 19 years. Children and adolescents are referred to Allies from the Oregon State Department of Human Services who fund the program. Youth participating in Allies are referred because of emotional and behavioral problems and borderline IQ. The program is directed by Kevin J. Moore, Ph.D. Referrals are made from DHS Child Welfare Workers to Lynn Matthews at the State DHS office.

Other programs: Special contracts with the State Mental Health Division and Department of Human Resources for MTFC.

Our Model

OCP is organized in a model that moves to decrease negative behaviors and to increase developmentally appropriate normative and prosocial behaviors. This is accomplished by:

- *Providing youth with a consistent reinforcing environment that builds on individual strengths*
- *Providing clear structure and limits with well-specified consequences that are delivered in a teaching-oriented way*
- *Providing close supervision of the youth's whereabouts*
- *Helping youth avoid associations with peers who are likely to have a negative influence, and developing skills for having relationships with positive peers*
