

## **Exercise #2: The Case of Bobby and Susie**

**Instructions:** Read the Case Plan Update below and develop questions as though you were conducting a review surrounding treatment issues for Bobby and Susie. Note your questions for the parties below. A representative from the SAFE Center and OSLC OCP will be present to address your questions.

---

### **Case Plan Update**

Bobby, age 8, and Susie, age 14, have been in care for six months. Their parents have left the area. DHS conducted a relative search and there were no relative resources. They were placed together in a foster home. Mental health assessments were completed. Bobby was diagnosed with Adjustment Disorder, PTSD and rule out sexual abuse (victim). Susie was diagnosed with Adjustment Disorder, PTSD and sexual abuse (victim). The children were participating in individual counseling; however, their behavior has deteriorated. Bobby is having difficulties at school, has nightmares, tantrums and is exhibiting highly sexualized behavior. Susie is skipping school, lying, having difficulty with authority figures, displaying inappropriate boundaries and has frequent tantrums that last several hours. The foster parent has requested that the children be moved. DHS is considering placing Bobby at the SAFE Center and referring Susie to OSLC OCP.

**(3) DHS has ensured that appropriate services are in place to safeguard the child/ren's safety health and well being.**
