*"Legal investigator" means a person or entity whose primary business is litigation support under the supervision or direction of an active Oregon State Bar member and who does not meet the definition of a background company or a data reseller, and who also does not qualify for a fee waiver.

**"Background company" means a person or entity who accesses or uses the OJCIN system for the purpose of obtaining OJD data to provide criminal record checks, pre-employment screenings, tenant applicant screenings, identity verification, or credit history exclusively to end users, and who does not meet the definition of data reseller.

***"Data Reseller" means a subscriber who accesses or uses the OJCIN system for purposes of obtaining OJD data to provide all or part of the OJD data: (i) to third parties as part of its business as a Data Broker (defined below); (ii) for inclusion in a database that is accessible by third parties; or (iii) to third parties who are not the End Users (defined below) of the data. "Data Broker" means an individual or entity, other than a title company, whose business is collecting and aggregating personal information and data on individuals and entities, then reselling or licensing such collected or aggregated information and data to third parties. "End User" means the ultimate consumer of the data, who uses the data solely for their own internal purposes and who does not further redistribute the data.

**** Bulk Data requires a separate application, agreement, and set up fee.
