STEP 4B: UNDERUTILIZATION NARRATIVE

The Oregon Judicial Department (OJD) workforce data reflects the workforce as of June 30, 2016. Under the Administrative Support category, which equals more than 71 percent of the OJD workforce, most persons who apply for these jobs reside within the county where the jobs are located. OJD historically uses county data to analyze this category, as well as the Service and Maintenance category, when submitting its Affirmative Action Report to the Oregon Legislature. The electronic format provided by USDOJ, Office of Justice Programs does not allow for mixing both statewide and countywide data. As a result, statewide data was used to evaluate these two EEO categories and the remaining EEO job categories used by OJD. Countywide data as described above is available in OJD's Affirmative Action Report.

Community labor statistics provided by the U.S. Census does not include data on persons with disabilities. OJD maintains data on its workforce for this category but has omitted this information for lack of valid comparators.

In response to a USDOJ, Office of Justice Programs directive in 2006, OJD developed a special database to capture the updated racial/ethnic categories required for this report. This included conducting a new survey of all OJD employees in early 2008.

A comparison of the OJD's workforce to the relevant labor force market for the state of Oregon indicates the underutilization in the following categories. To put these figures into proper perspective, the total number of employees in each category is included.

Officials and Administrators – total OJD workforce: 53

- Males – Whites are underutilized by 20%. Hispanics or Latinos are underutilized by 3%. Asians are underutilized 2%. Blacks or African Americans and two or more races are each underutilized by 1%.
- Females – Blacks or African Americans and two or more races are each underutilized by 1%.

Professionals – total OJD workforce: 345

- Males – Whites are underutilized by 7%. Asians are underutilized by 2%.
- Females – Asians are underutilized by 2%.

Technicians – total OJD workforce: 38

- Males – Blacks or African Americans and two or more races are each underutilized by 1%.

- Females – Whites are underutilized by 25%. Asians are underutilized by 3%. Hispanics or Latinos are underutilized by 2%. American Indian or Alaska Natives and two or more races are each underutilized by 1%.

Administrative Support – total OJD workforce: 1094

- Males – Whites are underutilized by 20%. Hispanics or Latinos and Asians are each underutilized by 1%.

Service and Maintenance – total OJD workforce: 1

- Males - Hispanics or Latinos are underutilized by 12%. Asians are underutilized by 2%. Blacks or African Americans, American Indians or Alaska Natives, and two or more races are each underutilized by 1%.
- Females – Whites are underutilized by 31%. Hispanics or Latinos are underutilized by 7%. Asians are underutilized by 2%. Blacks or African Americans and two or more races are each underutilized by 1%.

ANALYSIS

With the exception of the underutilization of

- white males in the Officials and Administrators, Professional, and Administrative Support EEO job categories,
- Hispanic or Latino males in the Officials and Administrators EEO job category, and
- White and Asian females in the Technicians EEO job category

the percentage of underutilization of both males and females in other races/ethnicities in all EEO job categories is 2% or less, except as noted below.

In the Service and Maintenance EEO job category, the number of employees (one) made it difficult to draw any reliable conclusion.

OJD's recruitment processes and procedures support equal employment opportunities for all employees and applicants.
