Weekly parenting time with non-residential parent (0 – 24 mo):

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday

Plan A: May be appropriate for families when one parent has not been the child’s primary caregiver or has never lived with the child but wants regular contact. Choose one:

- Three periods of 3 to 6 hours spaced throughout the week. Provides frequent contact to support bonding. Parents need to be able to support 6 child exchanges per week without conflict.
- OR–
- Two periods of 4 to 6 hours spaced throughout the week. May be more feasible for parents with nonflexible work schedules or higher levels of conflict.

Plan B: May be appropriate when both parents have been at least partially involved in day-to-day care of the child, have adequate parenting skills and have established a strong bond with the child. This plan could also be phased in after the child has successfully managed Plan A for a period of time.

- Two periods of 3 to 4 hours and one 8-hour period spaced throughout the week.

Plan C: May be appropriate when both parents have been equally involved in day-to-day care of the children, have been involved with medical appointments and enjoy a strong attachment bond with the child. This plan could also be phased in after a child has successfully managed a B level plan for a period of time.

- Two periods of 3 to 6 hours each week and one overnight each week or alternating weeks.
