Juvenile Data

Qualitative Data-A Way to Dig Deeper

Qualitative data is descriptive. It describes certain attributes and helps to understand the "why" or "how" behind certain behaviors. It is also dynamic and subjective, and open to interpretation.

Qualitative data is gathered through survey, interviews, and observation.

Surveys (formal or informal)

Ask team members to informally poll colleagues with questions.

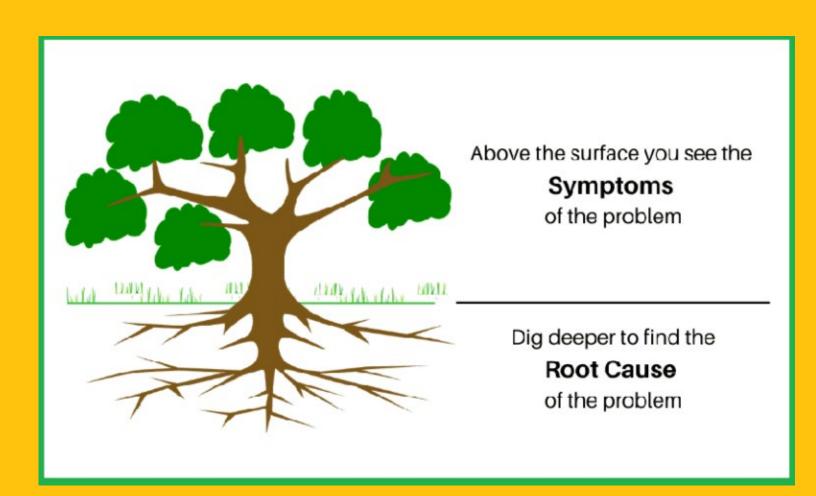

Create a feedback box that will allow for anonymous responses.

Ask JCIP to put together a survey on SurveyMonkey.

Focus Groups and Interviews

Invite a group of people to come to a meeting to give their perspective on a topic, like resource parents or caseworkers.

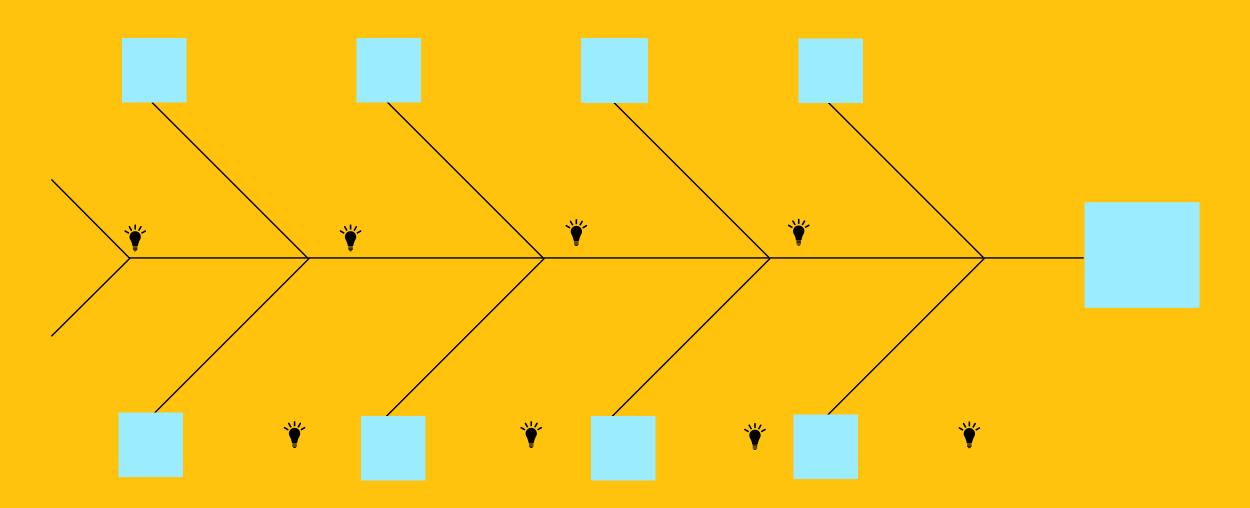

Interview a parent mentor to gain parent perspective. Or invite them to be a member of the model court team.
